

GAS CONTROLLER

• GAS DETECTION CONTROLLER

Model : SHT-910

Description

- ◆ SINGLE MONITOR
- ◆ MODEL : SHT-910

Applicable detector
SHT-4700

Features

- It is entry-level detector compact design with a competitive price
- Apply smps circuit , it is available in here and abroad regardless of the voltage and value frequency
- Artificial intelligence type with built in Microprocessor to detect gas leakage and malfunction.
- Alarm relay contact(H.HH) output
- Calibration functions of zero point and span with not volume but the automatic buttons
- Formal approval by Korea Fire Equipment Inspection Corporation
- Electromagnetic interference verification
- ◇ Single channel controller, be connected to local detector displays the gas value and alarms at alarm point be settled

Specification

Model No.	SHT-910	Measuring gas	LNG, LPG
Measuring range	0~100%(LEL)	Input signal	4~20mA
Measuring display	3Digit FND Digital display	Output signal	12V.DC. Relay contact
Alarm sound	Over 70dB	Operating temp /humid	-20℃~+40℃/85% RH
Operating power	220/100V.AC, 50/60Hz	Consumption electric power	5.5W
Mounting type	Wall mounting	Dimension	140(W) × 210(H) × 65(D)
Weight	1.12Kgs		

Dimension
